Summary

Software Engineer with internship experience spanning full-stack development, data engineering, and AI-driven automation across enterprise environments. Focused on building scalable systems, optimizing data pipelines, and delivering high-impact solutions that drive measurable business outcomes.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C

Frameworks & Web: React, Next.js, Node.js, Express.js, FastAPI, REST APIs, HTML5, CSS3, Tailwind CSS

Databases & Cloud: PostgreSQL, MongoDB, Snowflake, Redis, AWS, Azure, Docker

AI/ML & Data: TensorFlow, Scikit-learn, OpenCV, EasyOCR, LangChain, Pandas, NumPy, Apache Spark, Streamlit

DevOps & Tools: Git, GitHub Actions, CI/CD Pipelines, Power BI, Tableau, Figma, VS Code

Professional Experience

Johnson Controls | IT Intern

Jan 2026 – Present

- Architected a real-time analytics dashboard integrating 4 cross-platform data feeds via REST APIs for 20 stakeholders, eliminating a 4-hour reporting lag and enabling data-driven decision-making.
- Streamlined classification of 70–80 daily incident tickets by engineering keyword-based filtering and routing workflows, achieving 100% zero-touch categorization and removing all manual triage.
- Built a full-stack Roster Management System using TypeScript, React, Node.js, and MongoDB with a self-escalating notification engine delivering persistent Microsoft Teams alerts at 20-min intervals, cutting weekly coordination overhead.

HCLTech | Intern

Oct 2025 – Jan 2026

- Engineered a hybrid Image-to-Text platform using FastAPI, EasyOCR, and a GPU-hosted Qwen2.5-VL Vision Language Model, attaining 92% text extraction accuracy across 500+ document samples.
- Improved document processing throughput by 25% by optimizing OpenCV pre-processing pipelines including adaptive thresholding and noise reduction, benchmarked across 50+ high-resolution test cases.

Projects

Placement Management System

Node.js, React, MongoDB, PostgreSQL, REST APIs

- Accelerated recruiter shortlisting by 2x across 100+ active placement records by developing a role-based full-stack platform with optimized database queries, lowering report generation latency by 35%.
- Reduced scheduling conflicts by 50% by constructing an event-driven REST API notification system serving 3 distinct user roles: students, recruiters, and administrators.

DeFiVault – Blockchain AML Security Platform

Solidity, Ethereum, React, Next.js, Node.js

- Designed a 3-layer decentralized system with 3 Solidity smart contracts enforcing AML compliance, KYC verification, and tamper-proof transaction execution on Ethereum.
- Eliminated password-based attack vectors by configuring MetaMask ECDSA wallet authentication with instant Suspicious Activity Report generation for all flagged transactions.

Autonomous GitHub PR Agent

Python, GitHub API, Gemini API, pytest, CI/CD

- Orchestrated a 4-stage CI/CD pipeline spanning issue parsing, AI-driven code patch generation via Gemini API, local pytest validation, and programmatic PR submission, reducing manual fix cycles by 70%.
- Maintained zero regression rate across 15+ test scenarios by establishing a validation gate that blocks PR merges until all existing test suites pass.

Education

B.Tech, Computer Science & Business Systems

CGPA: 8.93/10

Mahatma Gandhi Institute of Technology, Hyderabad

Nov 2022 – Expected 2026

Achievements

- Silver Medalist** for Academic Excellence – Mahatma Gandhi Institute of Technology, Hyderabad.
- Institutionally nominated for **Smart India Hackathon 2024**, India's premier national-level innovation challenge.
- Head of Design, Techkriti 2024** – Led a 20-member creative team and delivered 40+ digital assets for 500+ participants.

Certifications

Database Programming with SQL (Oracle Academy) | Diamond Certified Smart Coder (Smart Interviews)

Data Structures & Algorithms (HackerRank) | GenAI Apps with Gemini & Streamlit (Google)

DSA 160 Days (GeeksforGeeks)

Publication

"Edutube: A Virtual Tutor", **IJIRSET**, Vol. 14, Issue 5, May 2025 [Link]
